# TS FleetWatch

## Cloud Fleet Management

TS FleetWatch is a cloud based fleet management application that provides detailed information on the location and status of your fleet on a continual basis.

**Combined with TS Telematics solutions**, you gain location and status tracking of your fleet vehicles and in-depth vehicle and driver data. Geo-fencing capabilities allow you to monitor work areas and improve vehicle security.

### TS FleetWatch enables:

#### ■ Enhanced Dispatch Process

Near real time vehicle location allows for efficient scheduling and dispatching.

#### ■ Increased Customer Service

Provide customers with accurate arrival and departure times based on optimized route specifications.

#### ■ Informed Decision Making

Data is stored on routes, customer orders and deliveries, and vehicle activities so that you can make informed decisions based on accurate information.

#### ■ Improved Vehicle Security

Create geo-fenced zones and authorized drivers for specific vehicles and receive email or text message alerts on unauthorized usage or activity.

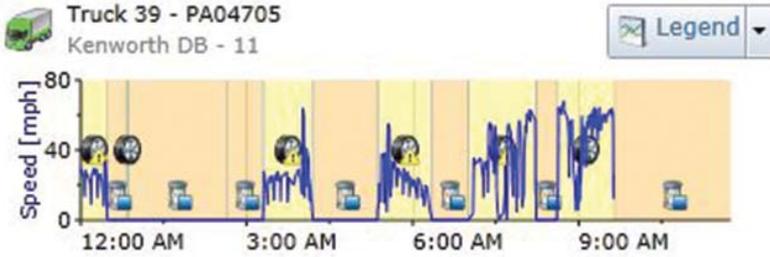

#### ■ Anywhere Management

As a cloud based application, access the portal through any PC with an internet connection enabling you to view and manage fleet activities whether in the office or on the road.

#### ■ Customized Reporting

Build reports at the driver level or the entire fleet to analyze fuel efficiency, miles driven, driver behavior, and route optimization.

## Driver Behavior Monitoring.

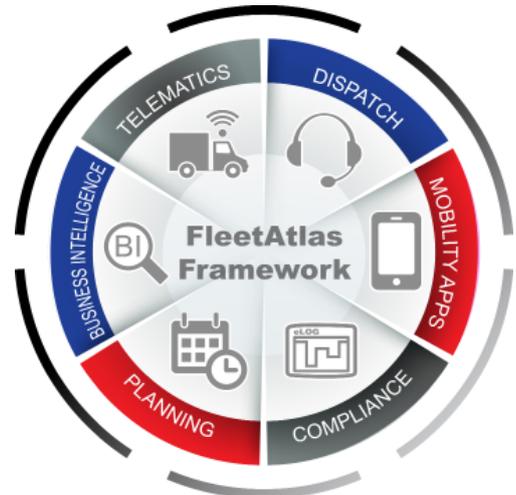

Customized reporting details average speed, acceleration, harsh breaking, distance travelled, and more.

Date	Distance/Driver	Time/Driver	Total   FUEL	Lp/100	Max Speed	Number   HARSH	ECCO	TP	ECCO	Speed	Eco Value
