

FuelWare

Fuel & Petroleum Distribution Software

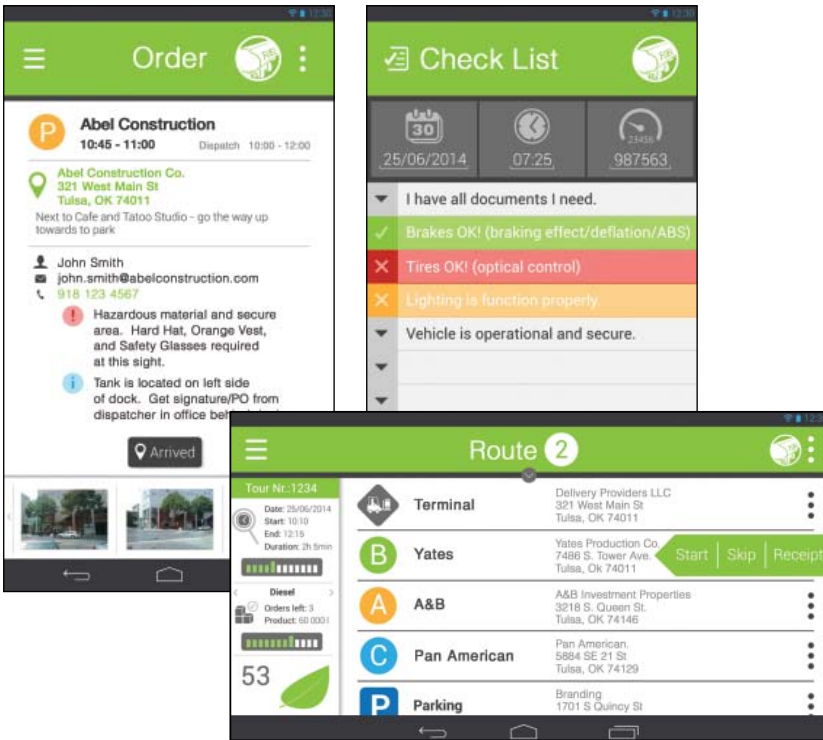

FuelWare is a Mobility Application designed to automate and standardize processes for fuel and petroleum distributors; seamlessly connecting drivers with dispatch, planning, and back office systems.

FuelWare manages driver's daily workflow – from start of day vehicle inspections to delivery tickets and invoicing – through a mobile device that stores and communicates information directly to your back officesystem, eliminating the need for paper based administrative processes.

FuelWare can help you:

- **Increase driver utilization**
Stepped processes within the system are designed to improve the efficiency of each delivery. Vehicle loading/unloading from terminal or depot, tank inspections, and deliveries are all completed by following prompts on the handheld.
- **Reduce costs through paperless processes**
Delivery tickets and invoices can be printed and left on site with signatures captured electronically, providing proof of delivery, consensus of volume, and accurate transaction details.
- **Improve data accuracy**
By automating the data transfer from the field to the back office system, data is entered into the system only once, by the driver, greatly reducing the chance for data entry error.
- **Enhance inventory management**
Load planning is easily managed with multiple compartment inventory controls and cross contamination prevention measures in place.
- **Simplify billing and payroll**
Time reporting, Billable/Non-Billable Events, and Non-Delivery Notifications are all tracked within FuelWare and integrated directly into your accounting system.
- **Operate within a single platform**
FuelWare provides you with a single system to manage multiple services, including Bulk Fuel and Petroleum, Lubricant, Home Heat, and Packaged Good Delivery, On-Site Fleet Fuelling, and Gravity Drops.

Application designed with portrait and/or landscape user interface

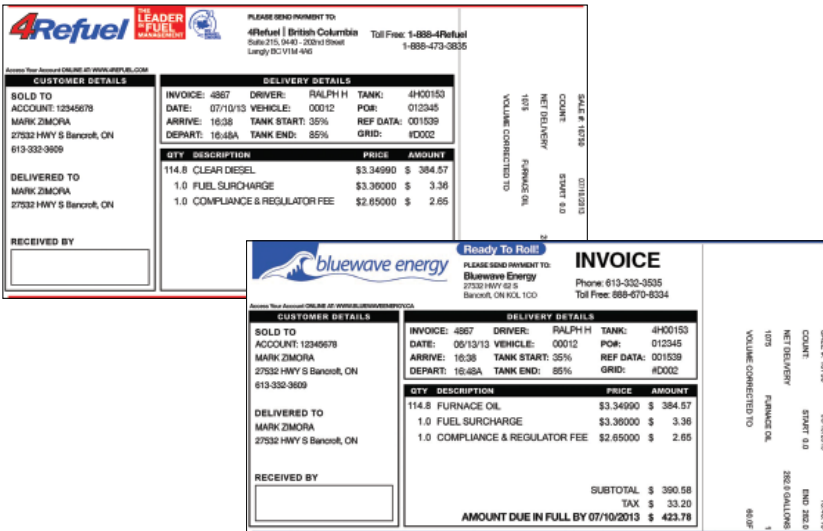

FuelWare is a component in a larger complete automation solution named FleetAtlas.

Progressively add components as your company grows.

High quality, point-of-sale tickets

Telematics

Fleet Tracking & Behavior Management

Dispatch

Dynamic Fleet Dispatching

Mobility Apps

Paperless Transactions & Automated Accounting

Compliance

Electronic Logbook & Fatigue Management

Planning

Fleet Scheduling & Route Optimization

Business Intelligence

Planning, Reporting, and Management

FuelWare Includes:

- Complex Mass Management algorithms
- On-board metering and measurement system interfaces
- Ergonomically compliant with entry and exit provisions
- DOT dangerous goods compliance reporting and documentation
- Integrated Navigation, Telematics, and Electronic HOS provision
- Dangerous goods environments and intrinsically safe equipment
