

TS ReportPro

Business Intelligence & Custom Reporting

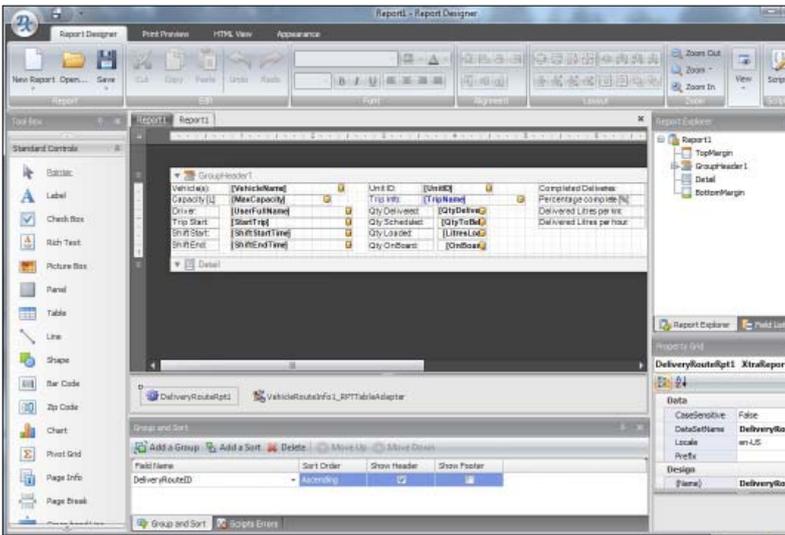

TS ReportPro is an office application that delivers unique business intelligence with unparalleled reporting capabilities to maximize automation benefits.

TS ReportPro is a desktop and server application designed to easily create and maintain complex reports or export configured report data from central servers housing mobility and enterprise application transactional information.

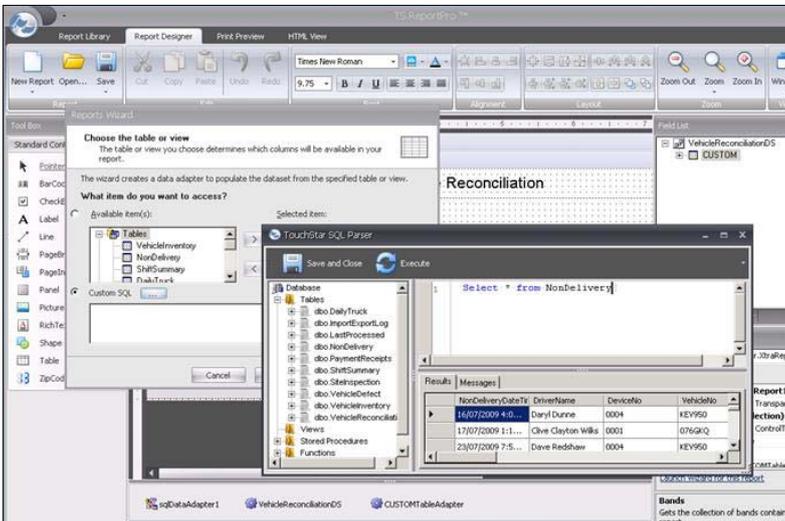

TS ReportPro provides:

- Standardized industry reports**
 Easily accessible reporting formats, methodologies and Key Performance Indicators (KPI) criteria are pre-configured to industry developed standards.
- Custom report designer**
 Operational, administrative and customer centric reports are customizable and the intuitive interface allows for simplified template development. Customer analytic requirements can be readily assimilated to ReportPro.
- Executive dashboard**
 ReportPro offers executive dashboard configuration for internal management functions and some customer reporting. Daily fleet and field KPIs can be easily condensed without additional system burdens.
- Multifaceted and automated reporting**
 ReportPro interprets and formats complex and multilayered data for holistic visibility of comprehensive field operations and reads specific data fields for regular reporting and comparative analysis. Automatic emailing of standard reports is rules based and easily managed.
- Data mining**
 Serving as a mediator between the field and your ERP, ReportPro streamlines vast amounts of field data and is configured to manage field generated forms.
- Paperless processes**
 ReportPro standardizes paperless processes and electronically translates field data to actionable intelligence.

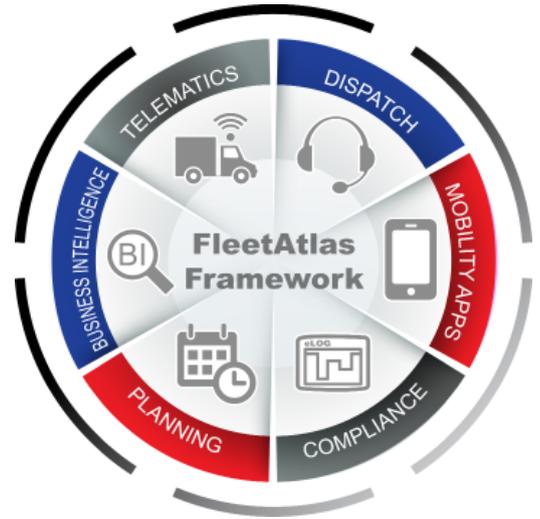

Custom report designer

Schedule reports to auto-generate

TS ReportPro is a component in a larger complete automation solution named FleetAtlas.

Progressively add components as your company grows.

Telematics
