

ACT - Automated Cylinder Tracking

Near-Field Tag-Reading Technology with TransPac

Ensure the safe-keeping of your LPG cylinders and manage cylinder rental accurately and securely with Near-Field Communication (NFC) Tag-Reading Technology. Bluetooth-enabled readers allow users to conduct cylinder inventory management processes quickly and efficiently. Contactless readers provide quick results, improving asset tracking efficiency especially when managing high-volume cylinder supplies.

Use portable, handheld NFC tag readers at cylinder storage sites, construction sites, and depot locations. Cylinder logs and status readings appear on TouchStar's TransPac app via the user's connected Android device.

NFC Tag-Reading Technology provides these benefits:

- **Automated asset tracking**
 All cylinder activity is tracked and logged to reduce theft and missing cylinders.
- **Real time cylinder maintenance alerts**
 Tags store manufacture and requalification dates and alert driver and depot on cylinders needing maintenance.
- **Improved asset utilization**
 Automated reporting to analyze cylinder turns and low or no use cylinders.
- **Bundled asset tracking**
 NFC tag reading allows for monitoring of bundled cylinders, making it unnecessary to scan each individual cylinder in a pallet.
- **Improved reading accuracy**
 NFC tags are more dependable and rugged than traditional bar codes and include read-write ability.
- **FleetAtlas integration**
 Works seamlessly with TouchStar's TransPac Android cylinder delivery app with link to FleetWatch for real time customer delivery details.

TransPac interface and tools make for quick, secure, and accurate cylinder tracking

The TransPac interface enables drivers to view cylinder inventory and make quick decisions based on the data provided.

Multi-field tablet displays provide all the information you need to track and maintain LPG cylinders properly and securely.

Handheld wand makes NFC tag reading simple

Handheld wand connected via Bluetooth to TouchStar's TransPac app provides superior asset tracking.

Lifetime cylinder-tracking is safer, as all cylinder activity is logged, so you know when it's time to refurbish.

Know who has each of your cylinders at all times using the intuitive, app-based activity log.

TransPac is a component in a larger, complete automation solution named **FleetAtlas**.

Progressively add components as your company grows.
